PROJECTS

Aiming
(Graduation Project)

Web App Server for E-Learning To Student Learning New Skills and Make Connect Between Users and Companies and this Contain Tools Help Users .

Easy Shop
(First App With Clean Architecture)

It is a Shopping Application that Makes it Easy for the Customer to Access Everything He Wants. Contains More Than One Screen. Getx Was Used as a State Management and Firebase as a Database and to Receive Data from APIs.

Majed Shopping Online
(First App Freelance)

It is an Online Shopping Platform that Contains Everything a Customer Wants to Buy. I Created This Project Using MVC Architecture, and This Project Was Only About View.

Buzzer
(First App In Company)

It is an Online Food And Restaurants Platform that Contains Everything a Customer Wants to Request Food then Can Take This From Place After End. I Created This Project Using MVC Architecture and Flutter Flow , Firebase , Google Maps.

Eldorasho
(Second App In Company)

It is an Online Shopping Platform (E-Commerce) that Contains Everything a Customer Wants to Buy. I Created This Project Using MVC Architecture, and This Project Was Have A Lot Of Featuers Like Chat and Maps and Connect Between Supplier And Use.

Real Link
(Third App In Company)

A Real Estate App Built Using Flutter , APIs and Google Maps Allows Users to Explore Properties On an Interactive Map. It Offers Features Like Property Search, Filtering by Location, Price, and Type, as Well as Viewing Detailed Property Information, Including Images, Descriptions, and Contact Details. The App Integrates Google Maps to Display Property Locations With Different Map Views.
